PARTS AND SERVICE

At PLUM Equipment, we support every piece of equipment we sell. Our experienced team of service technicians have a proven track record of keeping your recycling equipment running. Whether it's a simple PM or a large Reline, our service team is prepared to handle the job. PLUM Equipment is ready to service you with a fully equipped fleet of service trucks, an extensive parts inventory, and field proven technicians.

A few services we provide are:

- Equipment and System Installation
- Preventative Maintenance Programs
- Hydraulic Fluid Analysis and Conditioning
- Equipment Repairs and Reconditioning
- System Troubleshooting
- Fabrication Services
- Baler Relines
- Replacement Parts
- Shredder Cutter Changes and Rebuilds
- PLC Programming and Troubleshooting

VERTICAL BALERS

PLUM Heavy Duty Vertical Balers feature several innovations for ease of use and maintenance-friendly access. Features like the side-mounted power unit, front-facing panel box, and redundant-feed gate interlock system, all lead to years of trouble-free recycling. Our balers are made in the USA and utilize heavy-duty structural steel in the construction of our frame, platen, floor, bridge beam and cylinder mount, eliminating any structural failures.

Available Models	Description	Approx. Bale Weight (OCC)
PLUM3016 Liquid Extraction Baler	30" x 16" x 24"	180 lbs
PLUM630CC	60" x 30" x 48"	1000 lbs
PLUM63HD Heavy Duty	60" x 30" x 48"	1250 lbs
PLUM63LP Low Profile	60" x 30" x 33"	700 lbs
PLUM63XHD Extra Heavy Duty	60" x 30" x 48"	1300 lbs
PLUM730CC	72" x 30" x 48"	1200 lbs
PLUM73HD Heavy Duty	72" x 30" x 48"	1300 lbs
PLUM74HD Deep Chamber	72" x 40" x 48"	1500 lbs
PLUM74XHD Deep Chamber	72" x 40" x 48"	1700 lbs

HORIZONTAL BALERS

CLOSED DOOR BALERS

Horizontal Closed Door Balers combine the efficiency of automatic cycling and continuous operation to create dense bales, making your waste recycling operation more efficient. Once the bale is finished, bales are manually tied off. Closed door balers are appropriate for applications ranging from a couple bales per day up to several bales per hour.

Model	Charge Box Opening W x L	Bale Size W x H x L	Main Cylinder Bore	Cycle Time (seconds)	Main Motor
Piranha 836	56" x 36"	48 x 30 x 60	8"	33	20 HP
HL-60M	60" x 39"	48 x 40 x 72	8"	28.5	30 HP
CD-765-HS-30	60" x 50"	30 x 43 x 60	7"	30	30 HP
BARRACUDA	60" x 45"	41 x 30 x 60	(2) 5.5"	31	40 HP

AUTO-TIE BALERS

Auto-Tie horizontal balers provide an automated approach to baling recyclable material. The baled material is seamlessly tied at the end of each bale by an automatic tying system, providing a highly efficient solution for increased capacity baling requirements. Auto-tie balers should be considered when production requirements exceed 150 tons/month. They are ideal for distribution centers, manufacturing facilities, mid to large size recycling and material recovery facilities (MRFs), and mid to large size printers.

Model	Charge Box Opening W x L	Bale Size W x H x L	Main Cylinder Bore	Cycle Time (seconds)	Main Motor
AT-754-HS-30	54" x 50"	30 x 45 x V	7"	30	30 HP
HLO-608AR	60" x 45"	48 x 40 x 72	8"	9 - 20	30-75 HP
HLO-709AR	72" x 45"	48 x 40 x 72	9"	14.8 - 18.8	50-75 HP
HLO-8010AR	80" x 45"	48 x 40 x 72	10"	8.3 - 20.3	50-200 HP
ConQuest 180-200	72" x 72"	43 x 43 x V	12"	30	200 HP

TWO-RAM BALERS

Two-ram balers provide the most efficient and versatile means for high volume baling of multiple materials. These machines can quickly change over and start baling a different grade of material in a matter of seconds without any contamination or having to manually clean out the baling chamber. Bales are automatically tied and pushed out until the operator has time to store them.

PLUM Equipment is proud to be the exclusive dealer for Harris Balers in the Southeast. For more than 100 years, Harris has remained the clear industry leading manufacturer of two ram balers with features like the easily adjustable SmartKnife, Pre-Compression Lid, and the widest range of cylinder and power unit sizes in the industry.

Model	Charge Box Opening W x L	Bale Size W x H x L	Main Cylinder Bore	Cycle Time (seconds)	Main Motor
TRHE-750	50" x 60"	45 x 31 x 64	7"	18	50 HP
WOLVERINE	40" x 60"	44 x 30 x 60	8"	21	40 HP
BADGER	42" x 85"	45 x 31 x 64	10 or 11"	10-24.5	50-125 HP
GORILLA	58 x 105	45 x 31 x 64	12 or 13"	13.5	100 HP
TR-12/1388	57" x 90"	45 x 31 x 64	12 or 13"	10-18	100-200 HP
CENTURION	57.5 x 105	45 x 31 x 64	13"		150-200 HP

CONVEYORS

PLUM Equipment is a full system provider to the recycling and scrap industry. We offer custom baler or shredder feed conveyors and sorting systems to allow material to efficiently transfer into and away from your processing equipment. We are your single source for:

- Slider Bed Belt Conveyors
- Hinged Steel Belt Conveyors
- Combination Belt Conveyors
- Troughing Conveyors

SHREDDERS

PLUM Equipment offers a wide range of shredders that are commonly employed in applications for volume reduction, product destruction, or to properly size material. We offer single shaft, dual shaft, quad shaft, and strip style shredders for every application. Every application is unique and we can tackle your application with machines ranging from 2HP up to 200HP and multiple hopper sizes and cutter configurations.

COMPACTORS

STATIONARY COMPACTORS

Stationary Compactors are designed to deliver reliable performance in commercial and industrial applications. These highly efficient compactors reduce collection pickups and compact solid waste material into a fraction of its original size. They are capable of managing hard-to-compact refuse in a limited footprint. PLUM Creek designs each compactor for your application with a wide range of hoppers, chutes, doghouses, deck plates, and cart tippers.

SELF CONTAINED COMPACTORS

Self-Contained Compactors are designed to efficiently store and transport your waste without having to "break away" your receiving container. Self-Contained compactors are one integral unit, avoiding clean up and messy spills when being taken to the landfill. These compactors significantly reduce disposal costs, prevent contamination of your work area, and improve working conditions for your employees. Sizes range from 15 to 39 cubic yards to best fit your application. PLUM Creek designs each compactor to be customized for your application with a wide range of hoppers, chutes, doghouses, deck plates, and cart tippers.
